

AVVOLGIMENTI MOTORI ELETTRICI
B.A.M.E snc

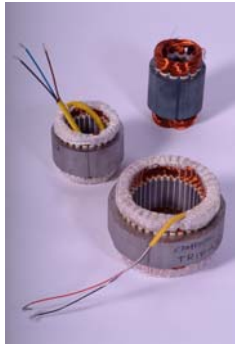

Our factory Bame was born in 1987 on purpose to give our service to big and small factories, that work in the electrical and electromechanical industry. For years we have been engagig in giving availability, collaboration and quality to our buyer factories, for each kind of application and requirement. Soon we will adopt the certification ISO 9002 in order to improve the quality of our products.

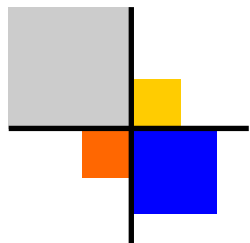

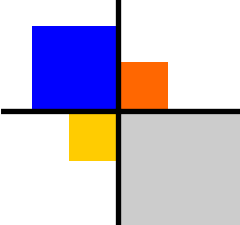

Our factory is specialized in the supply of electrical stators (maximum 5/6 speed), stators' cast, finished motors and each kind of shafts.

We have implements that permit us to do also small quantities of products with professionalism and efficiency.

We have a laboratory for development and tests of each kind of motors.

We own mechanical implements (lathes, milling, rolling and grind machineries...) that can do each kind of mechanical manufactures.

We have a supplied warehouse that can satisfy all our clients' needs.
